# SilaMill **5.8** edition

Dusk-till-dawn milling & grinding.

Innovation in dental technology.

## SilaMill 5.8 edition – the versatile powerhouse for dental labs

The SilaMill 5.8 edition redefines versatility and performance in digital dental manufacturing. This highly advanced milling system has been developed for dry and wet machining and enables the precise production of sophisticated dental restorations at the highest level.

With five simultaneously operating axes and a tilt angle of up to  $\pm 30$  degrees, the 5.8 edition ensures accurate milling of undercuts and maximum indication diversity. The integrated eightfold blank changer allows continuous, around-the-clock machining, automatically inserting the required blank for each job.

Rely on premium spindle technology with 600 watts of power and 60,000 RPM, exceptional 3-micron repetition accuracy, and a solid cast-body design for outstanding stability.

5 Axes

8 Blanks

24 Blocks

16 Tools

3 Ionizers

Wet & Dry

incl. CAM Software

## Areas of use: Materials & Indications

Composites

PMMA

Wax

Glass Ceramics

Zirconia

Titanium

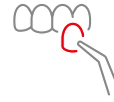

CoCr

Crowns & Bridges

Inlays & Onlays

Veneers

Abutments

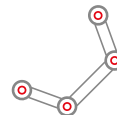

Occlusal splints

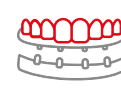

Primary crowns

Screwed crowns

Implant bar

Full denture

Denture frameworks

Secondary Crowns

Screw-retained bridge

Model plates

Model tooth die

Surgery guide

Innovation in dental technology.
